A letter is good. Lets say end of May - May 30.

>>> Beth Ericksen 5/7/08 11:45 AM >>>  
Yes I think it's ok, but is it ok for Linda to tell us they are delayed and will submit end of May? Can we get a 'hard date' for their submittal? I will then generate a letter and send it to Clyde. Then he will know the commitment that Linda is making and that we're ok with it.

My comment to her email below:  
I am not convinced they are 'overbonded', but that their acreage increased.

Please advise.  
Thanks,  
Beth

Are you okay with this? If so I'll reply and print for file.

Hello Susan:

In reference to the April 16, 2008 letter to Mr. Carl Clyde at Geneva Rock, regarding a Request for Plan Update Regarding Surety Calculations for the Pelican Point Quarry, M0490011, and per our conversation today, Geneva understands that they are overbonded according to the letter. Rather than provide an update to the present bond calculation, as requested in the referenced letter, Geneva will be providing a Plan Amendment and re-calculated bond amount to the Division by the end of May 2008.

Thank you.  
Linda
